

HADEED UL HASSAN

Full-Stack Developer (MERN) | Islamabad, Pakistan

hadeed.hassan189@gmail.com | +92 326 9908189 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js) with hands on experience designing secure REST APIs, automating backend workflows, and delivering production ready web platforms. Skilled in authentication systems, role based access control, payment integrations, and cloud deployment, with a track record of building and shipping complete systems across startup, freelance, and contract engagements.

TECHNICAL SKILLS

- Frontend: React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap, Material UI, Shadcn UI, HTML, CSS
- Backend: Node.js, Express.js, REST API Design, JWT & OAuth Authentication, Role-Based Access Control (RBAC)
- Databases: MongoDB (Mongoose), PostgreSQL (Drizzle ORM), Neon
- DevOps & Tooling: Docker, Docker Compose, Git/GitHub, CI/CD basics
- Integrations & Libraries: Stripe, Cloudinary, Nodemailer, Upstash, Arcjet, Zod, Winston, Commander.js, Inquirer.js

EXPERIENCE

Softly, Junior Backend Developer

Oct 2025 – Jan 2026

- Developed and maintained backend features and REST API endpoints using Node.js and Express.js within a live production codebase.
- Integrated REST APIs with frontend components, ensuring reliable data flow and consistent request/response handling across the full stack.
- Built and maintained Express.js route handlers and middleware, strengthening code structure, error handling, and overall backend reliability.

Jaynex IT, Backend Engineer (Intern)

Jul 2025 – Sep 2025

- Engineered authentication systems and centralized error handling middleware for backend services using Node.js and Express.js.
- Implemented bot and abuse detection using Arcjet and automated background workflows with Upstash, improving backend performance and reliability.

Alnoor Abaya, Freelancer Full Stack Developer

Mar 2025 – May 2025

- Delivered a full stack e commerce platform end to end, covering product catalog, shopping cart, and checkout flows for a retail client.
- Managed the engagement independently as a freelance contractor, from requirements gathering through deployment.

FEATURED PROJECTS

U Sleep — Job Proposal Automation Platform (Final Year Project)

Feb 2026 – Jul 2026

- Developed a MERN SaaS platform automating freelance proposal submissions through a 7-step pipeline covering job fetching, proposal generation, and automated sending, integrated with the Freelancer.com API (Upwork integration planned).
- Validated the pipeline end-to-end across 2 test user accounts, fetching 20+ live jobs, auto-generating proposals for all listings, and auto-sending 10+ proposals per user.
- Implemented Stripe subscription billing and centralized Express error-handling middleware, mapping Mongoose errors to consistent JSON responses with structured Winston logging.

Tech: Node.js, Express, MongoDB, React, Vite, Tailwind CSS, Stripe, Upstash

Zenora — LMS Platform

Jan 2026 – Feb 2026

- Engineered a full-stack LMS supporting 3 role-based access levels (admin, instructor, student), covering course creation, enrollment, cart, payments, and usage analytics.
- Designed enrollment logic enabling students to hold up to 3 active courses concurrently before purchasing additional courses, with Stripe-integrated checkout.

Tech: React, Node.js, Express.js, MongoDB, Redis, Stripe, Cloudinary, JWT

Acquisitions — Secure REST APIDec 2025

- Architected 4 role-based REST endpoints with JWT authentication and access control, rate-limited to 150 requests per minute, returning consistent 4xx/5xx JSON responses.
- Implemented request validation with Zod, bot and attack protection with Arcjet, and structured logging with Winston; passed all 8 Jest test cases and containerized the service with Docker.

Tech: Node.js, Express.js, PostgreSQL, Drizzle ORM, Neon, JWT, Zod, Arcjet, Docker, Jest

Readme Generator — README Generator SaaSOct 2025 – Nov 2025

- Built a full-stack README Generator SaaS enabling developers to generate polished project documentation quickly.
- Implemented authentication, plan-based template access, and a live markdown preview for real-time editing.
- Integrated Stripe-powered plan upgrades to support premium template tiers.

Tech: React, TypeScript, Node.js, Express, MongoDB, Stripe

EDUCATION

Quaid-i-Azam University, IslamabadSep 2022 – Jun 2026

Bachelor of Science in Information Technology (BSIT)

Relevant Coursework: Web Programming, Database Management Systems, Advanced Web Engineering, Software Engineering, Cybersecurity Fundamentals

CERTIFICATIONS

Backend Engineer (Node.js & Express.js) | KG Coding with Prashant

FastAPI | NAVTTAC

Silver Award — Final Year Project | Director, IIT, Quaid-i-Azam University

DevOps | Coursera
