Education

Quaid-i-Azam University

Bachelor of Science in Information Technology (BSIT)

Sep. 2022 – June 2026

Islamabad, Pakistan

Relevant Coursework:

Web Programming, Database Management Systems, Advanced Web Engineering, Software Engineering

Professional Summary

Full-Stack Developer with hands-on experience building and deploying production-grade web applications, REST APIs, and CLI tools using the MERN stack and modern DevOps practices. Proficient in designing secure, scalable backend systems with JWT authentication, role-based access control, structured error handling, and third-party integrations including Stripe, Cloudinary, and Upstash. Experienced in containerized deployments with Docker and Nginx, relational and non-relational databases, and developer tooling. Passionate about writing clean, maintainable code and delivering complete end-to-end solutions.

Core Responsibilities

- Develop full-stack web applications using React.js, Node.js, Express.js, and TypeScript.
- Build responsive, reusable UI components with Tailwind CSS ensuring cross-browser compatibility.
- Design and implement secure RESTful APIs with validation, error handling, and consistent JSON responses.
- Implement JWT-based authentication, OAuth (Google), and role-based access control.
- Integrate third-party services including Stripe, Cloudinary, Nodemailer, and Upstash.
- Work with MongoDB (Mongoose) and PostgreSQL (Drizzle ORM) for data modeling and queries.
- Containerize and deploy applications using Docker, Docker Compose, and Nginx.
- Build CLI tools and developer utilities using Node.js, Commander.js, and Inquirer.js.
- Debug, refactor, and maintain codebases for performance, stability, and scalability.

Relevant Work

Universal File Converter

- Built a full-stack file converter platform supporting upload, conversion, compression, and download of multiple file types.
- Implemented secure authentication, usage analytics, credit tracking, and an admin panel.
- **Tech:** Node.js, Express, MongoDB, Mongoose, React, Vite, Tailwind CSS

Subscription Tracker

- Built a subscription tracker API handling authentication, user management, subscriptions, and automated renewal reminders.
- Integrated Upstash Workflow for scheduling, Arcjet for security, and Nodemailer for email notifications.
- **Tech:** Node.js, Express.js, MongoDB, Mongoose, JWT, Upstash, Arcjet, Nodemailer

Readme Generator

- Built a full-stack README Generator SaaS with authentication, plan-based templates, live markdown preview, and export functionality.
- Integrated Stripe for upgrades and handled errors using Zod validation, custom AppError, global Express middleware, and Axios interceptor toasts.
- **Tech:** React 18, TypeScript, Vite, Node.js, Express.js, MongoDB, JWT, Passport.js, Stripe, Zod

Zenora — LMS Platform

- Built a full-stack LMS with student, instructor, and admin modules covering courses, enrollment, cart, payments, and analytics.
- Managed DevOps using Docker, Docker Compose, and Nginx for containerization, service orchestration, and deployments.
- **Tech:** React, Node.js, Express.js, MongoDB, Redis, Stripe, Cloudinary, JWT, Docker, Nginx

U Sleep — Job Automation Platform

- Built a MERN job automation platform with authentication, job and proposal management, and Stripe billing with subscription workflows.
- Centralized Express error middleware to map Mongoose errors to consistent JSON responses, with structured logging via Winston.
- **Tech:** Node.js, Express, MongoDB, React, Vite, Tailwind CSS, Stripe, Upstash

Acquisitions — REST API

- Built a secure REST API with role-based authentication, rate limiting, and structured error handling with clear 4xx/5xx responses.
- Implemented validation with Zod, security with Arcjet, structured logging with Winston, and containerization with Docker.
- **Tech:** Node.js, Express.js, PostgreSQL, Drizzle ORM, Neon, JWT, Zod, Arcjet, Docker, Jest

Switch-CLI

- Built a Node.js CLI for rapid project-context switching with add, list, remove, and launch commands supporting editor and start command automation.
- Implemented strict input and path validation, duplicate checks, confirmation guards, and cleanup of stale config entries.
- **Tech:** JavaScript, Node.js, Commander.js, Inquirer.js, Conf, Chalk, cli-table3

VoltX — Windows CLI Tool

- Built a Windows-focused Node.js CLI covering config management, network diagnostics, project scaffolding, and task automation.
- Added persistent settings, interactive commands, and reusable templates with clear logging, validation, and fallback handling.
- **Tech:** Node.js, ESM, Commander, Express, MongoDB, Mongoose, Inquirer, Chalk, Chokidar

Technical Skills

Frontend: React.js, JavaScript (ES6+), HTML, CSS,

Libraries: Tailwind CSS, Bootstrap, Material UI, Shadcn UI

Backend: Node.js, Express.js, PHP, REST APIs, JWT

Databases: MongoDB, MySQL, SQL

Tools & Concepts: Git, GitHub, MVC Architecture, Authentication, API Integration, Responsive Design
