PROFILE

Passionate and detail-oriented Full-Stack Developer specializing in the MERN stack (MongoDB, Express, React, Node.js) with hands-on experience in both frontend and backend development. Skilled in designing scalable systems, developing APIs, and creating intuitive UI/UX. Strong understanding of SQL and MySQL, delivering reliable, efficient, and optimized applications.

EDUCATION

QAU, ISLAMABAD

(2022 - 2026)

Bachelor's in Information Technology (BSIT)

COURSE WORK

Web Programming, Database Management Systems, Adv.Web Engineering, Software Engineering

EXPERIENCE

- Completed a 2-month remote internship at Jaynex IT, Lahore. (July 1, 2025 - Sept 1, 2025)

PROJECTS

- Universal File Converter & Compressor**

A full-stack platform for converting and compressing various file formats with smart routing and activity tracking. Tech Stack: MERN, Node.js, Express, MongoDB, React, Tailwind CSS
Features: Multi-format conversion, file compression, job queue management, secure file handling.

- Departmental Voting System**

An online voting platform designed for departments with secure authentication and realtime result calculation. Tech Stack: MERN, JWT, Express, MongoDB
Features: Role-based login, live vote count, secure result generation.

- Upwork Automation Tool**

A backend automation tool that fetches and filters job listings based on user preferences using Upwork APIs. Tech Stack: Node.js, Express.js, MongoDB, Axios
Features: Intelligent job search, keyword filtering, user preference persistence.

- Shades — UI Design Agency Platform**

A frontend web app for a design agency that showcases UI templates and creative design work. Tech Stack: React.js, Tailwind CSS, Framer Motion
Features: Dynamic layout, responsive design, interactive animations.

- **Bank Statement Converter**

A backend tool that converts raw bank statements into structured data formats for analysis. Tech Stack: Node.js, Express.js, SQL/MySQL Features: Multi-format parsing, automated data extraction, CSV/JSON export

- **Zentry Gaming Platform**

A gaming platform showcasing an immersive UI and interactivity. Tech Stack: React.js, Tailwind CSS, Framer Motion Features: Animated sections, smooth transitions, responsive design.

- **Airbnb Clone**

A full-stack clone of Airbnb with property listings, booking, and authentication. Tech Stack: MERN, React.js, Node.js, Express.js, MongoDB, Stripe Features: Search filters, booking calendar, secure login, payment integration.

- **Entire Downloader**

A full-stack web application that allows users to download media files efficiently from multiple platforms.

Tech Stack: MERN, React.js, Node.js, Express.js, MongoDB

Features: Fast download engine, user-friendly interface, authentication, and download history tracking.

TECHNOLOGIES

Backend Development

- **Technologies:** Node.js, Express.js, PHP, Stripe, Cloudinary, Socket.io, Redis, Mongoose
- **Databases:** SQL, MySQL, MongoDB
- **Concepts:** REST APIs, Real-time communication, Payment integration, Caching, Authentication & Authorization

Frontend Development

- **Technologies:** HTML, CSS, Bootstrap, Tailwind CSS, React.js
- **State Management:** Redux Toolkit, Context API
- **UI Libraries:** Shadcn UI, Material UI
- **Concepts:** Responsive design, Component-based architecture, SPA (Single Page Application)

MERN Stack Expertise

- **Stack:** MERN (MongoDB, Express.js, React.js, Node.js)
- **Focus:** Building scalable, responsive, and secure web applications with modern UI and optimized backend logic
